

## Lasting Style and Shape Permanence

are what every discriminating clothes buyer desires.

Much of the price you pay for your clothes represents the appearance, the style and the fit. If these depart with the first damp weather—as with ordinary garments—what value are you getting for your money?

Give thought to how your Suit or Overcoat will look in a month—three months—or a season.

And, when buying your clothes, ask for

### THE PILARES MINE A VOLCANIC CRATER

Big Producer in the Moctezuma District Near Nacozari, Sonora, Mexico.

Five miles from the town of Nacozari, district of Moctezuma, Sonora, Mex., is a mine now recognized as one of the world's most important producers. Overlooking Nacozari is a concentrator built of concrete and steel at a cost of \$1,000,000, one of the most perfect plants of its kind in existence. The mine is the Pilares, and most property and the concentrator, which can handle 3000 tons of Pilares ore daily, are the principal assets of the Moctezuma Copper company of Phelps-Dodge that earned \$1,044,454 above all expenses last year, distributing \$988,000 in dividends.

**One Body In Crater.** The most interesting thing to prospectors and mining geologists is that the Pilares ore body is in an old volcanic crater, as is the case of the famous Bessie mine in Colorado, that yielded \$10,000,000 of gold and silver in the throat of an extinct volcano.

The Pilares ore body in shape may be compared to a gigantic pear, measuring 2000 feet from end to end and 800 feet in its widest part. The ore may be likened to the skin and core of the pear, the skin varying in thickness from zero to 200 feet, and the core representing an area 300 by 200 feet.

**Two Main Shafts.** Two main working shafts, each of three compartments, have been sunk, and these are known as the Pilares and Esperanza shafts. At depths of 575 and 595 feet, respectively, the shafts connect with the Porvenir, or main traction tunnel, with which all workings are connected, and in which there is electric haulage. The Esperanza shaft has been sunk 200 feet additional, and at that depth another traction tunnel will be driven.

The present ore reserves, with a total

### THE MIAMI AT GLOBE PREPARES FOR SHIPMENTS.

In the Miami mine at Globe, Ariz., the extraction of ore will be commenced on the 370 foot level and from there upwards. The first ore to be taken out of the mine will come from the vicinity of shaft 2. Two raises are now being put up from the main haulage level 420 feet from the surface to the large dump at the main shaft, commonly called the Red Rock or No. 4. Through these raises the ore in the dump amounting to about 250,000 tons will be shot down to the haulage level and hoisted directly from there through the main shaft to the concentrator bins.

The Miami Copper company is now operating three churn drills on its property. These drills are sinking holes on Pinto, Captain and St. John's Fraction. The idea being worked out by the management in the churn drilling at present is to set definite limits to the main ore body, and for this purpose holes are being put down around the outer edges of irregular mass of ore developed and blocked out by the underground workings. In some cases this drilling is bringing to light ore reserves not previously known to exist.

**EL PASO CONSOLIDATED CO. ISSUES QUARTERLY REPORT.** Stockholders of the El Paso Consolidated Mining company have received the quarterly report of the general manager, in which he says water will be running through the tunnel before October 1. The net production of the El Paso in June, July and August was \$97,716.49, of which the company received \$25,017.40.

### SCROFULA HEREDITARY BLOOD POISON

Scrofula is a disease manifested usually by a swelling and ulceration of the glands, especially about the neck. It is almost entirely hereditary in its origin, being the dregs or remains of some specific blood poison. Where the blood is greatly weakened with the scrofulous poison, the disease attacks other portions of the system besides the glands, and then we see its effects in weak eyes, poorly developed bodies, running sores and ulcers, skin diseases, especially on the scalp, catarrhal troubles, etc. Scrofula usually makes its appearance in childhood, though manhood or womanhood may be reached before the poison progresses to the stage of outward manifestation. S. S. S. is the one real cure for Scrofula. It is a blood purifier without an equal, and it cures this destructive blood poison by removing every trace of the infection from the circulation. S. S. S., in addition to cleansing and purifying the blood, assists the stomach and digestive members in the creation of new blood corpuscles and other nourishing matter for the circulation. S. S. S. increases the resistive powers of the system and by strengthening and building up the vitality, allows nature to make a perfect and lasting cure. Book describing the disease and any medical advice sent free to all who write.

THE SWIFT SPECIFIC CO., Atlanta, Ga.

### MOGOLLON MINES ARE DEVELOPING

All Properties There Are Reported to Be Doing Some Active Work.

Mogollon, N. M., Sept. 23.—In the Mogollon mines drifting continues towards the Queen vein in the great ore body opened up in the lowest level several months ago. The main width exceeds 20 feet and the average value is around 20 per ton. During the week \$25 tons were milled and 9500 troy ounces of refined gold and silver melted. The usual shipment of high grade concentrates, the product of the mine, will be made to the smelter. The junior member of Messrs. Spurr and Cox visited the property.

On the Deadwood mines work is being pushed with the energy characteristic of this management. Grading for the mill is nearly completed and the construction of the building has been started. Machinery is being delivered daily.

From the Ernestine Mining company properties 500 pounds of refined gold and silver bullion and a large tonnage of high grade concentrates were shipped during the week. Installation of pipe line for new water supply system has been started and will be rushed to completion.

The Golden Link group of gold properties on Upper Dry creek, have been bought by Wisconsin parties who have organized the Golden Link Mining company, capitalized at \$250,000.

A well known engineer of Silver City is said to have taken an option on the mines owned by the Kitt Development company.

At the Mogollon Gold and Copper company a good force is engaged in clearing up the debris from the recent fire. The compressor and three boilers are thought to be only slightly damaged. Contractors have been awarded for advancing the east drift on the Little Charlie and the tunnel on the main, Cooney vein.

Water was encountered in sinking the mine below the tunnel of the Enterprise Mining company property, and some sulphide ore is reported as coming in.

### THE VULTURE MINE IS A BIG PRODUCER

Operating Two Shafts, Installs New Stamps and Cyanide Plant.

After 20 years of idleness, the Vulture mine, near Wickenburg, Ariz., has for two years been making a new and profitable record. The Vulture mine has a record of over \$16,000,000 gold to its production credit, and is still claimed to be a great mine.

The management has been erecting a mill on the property, and has about completed a system of development, which it is claimed will put it on its old time productive basis as a yielder of gold. Two shafts are now in operation, one being 600 feet deep and the other 400 feet deep.

The company has recently installed a 20 stamp mill in connection with the old 20 stamp mill. The new stamps are said to be the heaviest ever brought to the territory, weighing 1600 pounds each.

The company has also installed a new cyanide system which will handle a continuous percolation system of tailings, instead of the old system of handling by the hour. The company has 150 men working at the mine.

### KINGMAN POWER PLANT IS BEING ENLARGED.

Kingman, Ariz., Sept. 23.—The concrete work for the new unit that is to be installed at the big power plant in Kingman, Ariz., is about completed, and the machinery will be put in place as soon as it arrives.

The new unit will double the power of the plant and enable the greater distribution of electric power throughout the district adjacent to Kingman. The transmission line will be extended to the Union Pass section, where power will be used by the Frisco Mining and Power company in the operation of its mines and mill.

### NEW YORKERS TO SECURE NORTH TIGRE PROPERTY.

Bisbee, Ariz., Sept. 23.—A deal whereby New Yorkers may acquire large holdings in the North Tigre mine is responsible, according to Richard Brown of Douglas, for the closing down of work at the mine. It is the intention of the company to allow the property to be sold to the examining party has been completed. It is then hoped that through the purchase of large blocks of stock by the eastern investors a mill can be erected at the mine.

### ALLEGED SLAYERS OF TWO GLOBE MEN ARE PRISONERS.

Albuquerque, N. M., Sept. 23.—A special from Adamana says that sheriff Thompson, of Globe, at 9 o'clock last night arrested James Steele and William Stewart, former United States soldiers, who were charged with the murder of Fred Kibbe and Albert F. Hillpot, business men of Globe. Sheriff Thompson and a posse of five men found the fugitives at the Santa Fe station at Adamana. No fight was put up by either man. This ends a nine-day chase which was participated in by peace officers, Indian trailers and bloodhounds.

### CHANDLER REVOKES POWER OF ATTORNEY.

New York, Sept. 23.—Robert Winthrop Chandler has revoked the power of attorney he gave Lina Cavalleri to collect the income from his estate under their famous anti-nuptial agreement. This statement was made by Sidney Harris, Chandler's attorney.

### BISHOP LOSES FAT WALLET.

New York, Sept. 23.—The timely discovery by Benj. Jackson, a negro porter, of a fat wallet on the French line pier, was all that prevented Mgr. Pouchet, bishop of Orleans, France, from sailing for home penniless. The bishop sailed on the liner Lorraine after attending the recent eucharistic congress at Montreal. He discovered the loss of his money, about \$2500, just as the ship was casting loose. Jackson, meanwhile, had found the wallet and was gloating over its contents when two detectives discovered him.

### AMERICAN TYPEWRITER FIRST.

Brussels, Belgium, Sept. 23.—The Smith-Premier typewriter manufactured at Syracuse, New York, has been awarded the grand prize over all competitors at the Brussels International exposition.

T. C. Valenzuela has come back from Mexico City, where he went to attend the centenary celebration.

### KILLS WOMAN AND HANGS HIMSELF

Married Man Ends Life of Another Man's Wife; Then Suicides.

Cleveland, Ohio, Sept. 23.—The man who yesterday killed a woman and then hanged himself in jail, proved to be Burton W. Yates, of Detroit, as suspected. The double tragedy came as the end of an acquaintanceship of unknown duration with Mrs. Fred Singer, his victim.

Last night the woman's attorney, Frank Fullam, was closeted with Yates's two sons for several hours. The results of the interview were not given out. The young men, A. W. and H. F. Yates, hurried here from Detroit as soon as the news of the shooting reached them. Yates was 48 years of age and married.

Mrs. Singer, formerly a resident of Detroit, but lately residing in a Cleveland hotel, is the wife of a traveling salesman. Yates and the woman spent Wednesday afternoon and evening in an automobile. At midnight they went to a roadhouse at Rocky River, a western suburb of the city. Four hours later the shooting occurred. Mrs. Singer was shot through the back and through both legs.

While the woman was borne to a hospital Yates was taken to the Cleveland jail and there he hanged himself in the washroom, using his handkerchief as a noose.

Mystery surrounds the relations of the pair. Mrs. Singer has been estranged from her husband for months.

### TOYAH IS DRILLING FOR ARTESIAN WATER

Machinery Is Purchased in El Paso for Purpose of Sinking Wells There.

Toyah is going after its wealth of artesian water regardless of the outcome of the Toyah oil fields. C. E. Gibbons, cashier of the First National bank of Toyah, and Ed E. Dismuke, of Mineral Wells, were here Thursday arranging to have a deep well sunk on section 44, block 55 of the T. & P. survey. It is expected to sink a well to the deep water level in order to obtain water for the irrigation of a large tract of the fertile Toyah valley land. Mr. Gibbons says that the Texas company has succeeded in getting the tools out of the No. 2 oil well which was drilled on the opposite side of the dry wash separating the No. 1 and No. 2 wells in the Toyah field.

### GILLETTE MAY BE ASKED TO BAR CANTEN LIQUORS.

Investigation by Former Chaplain Nave, of California Camp, May Start War Against Alleged Liquor Sales.

Los Angeles, Calif., Sept. 23.—As a result of an investigation made at Camp Atascadero by Orville J. Nave, of Los Angeles, a retired United States army chaplain, it is expected that reports will be sent to governor Gillette against the alleged sale of liquor in canteens at the military camp. "It is a matter of common knowledge at the camp that these canteens are selling liquor under very thin guises and that intoxication among the regulars is not an uncommon thing," said chaplain Nave. Chaplain Nave is the father of P. S. Nave, United States district attorney at Tucson.

### THREE VESSELS OF NAVY TO BE SOLD FOR JUNK

Washington, D. C., Sept. 23.—It required six weeks' time to wipe the collar Marcellus off the naval list, although for that time she had been lying on the bottom of the Atlantic, 70 miles off Cape Hatteras. The ship was rammed and sunk by an Italian steamer.

The official order declaring the Marcellus defunct was issued by the navy department yesterday. Three other vessels also went on the dead list yesterday, the Siren, which was a yacht purchased for use in the Spanish war; the Eagle, a small gunboat, and the ill-fated Bennington.

After spending several thousand dollars on the latter in the effort to repair the damage caused by the terri-

ASKIN & MARINE COMPANY

## \$100 A WEEK

BUYS ANY STYLE

### That Tailored Suit!

- Every garment in our Women's Department is strictly hand tailored.
- That assures you of a perfect-fitting, properly-made, Tailored Suit.
- All of the novelty weaves, and all of the plainer styles are ready for your coming.
- Splendid values, from \$12 to \$35.

There are a lot of novelties here in Men's Fall Suits, and every pattern is different from anything we have had in the past. Men, come in and look over these "winners." Any price from \$12 to \$30.
